

Frequently Asked Questions

Q. I've heard about Genuine Viton®. What does that mean?

A. Viton is a registered trademark of DuPont Elastomers. To put it simply, all Vitons are fluoroelastomers, but not all fluoroelastomers are Viton. Genuine Viton® is a licensing program initiated by Dupont Dow to both educate the market about the design benefits of using Genuine Viton® materials and to ensure integrity of the Viton supply chain from Dupont to parts manufacturers to distributors to the ultimate end-user.

Q. I'm dealing with potable water. Do you have any seals for this?

A. Yes, we have several materials suitable for FDA/NSF applications. As the variety of options is too numerous to discuss here, please call us for assistance.
