

## Jeweller's Rubber

Kelseal Rubber specialises in supplying a range of quality Jeweller's Rubber and has done so for many years. We are Australian manufacturers, do not import any of our rubber. We have equipment, which provides a superior finish

Our full range of rubbers is as follows:

<b>Code</b>	<b>Type</b>	<b>Hardness</b>	<b>Description</b>
Sil1	Silicone	60 Duro	Very soft, easy to use, with excellent shelf life. Used for specialist work.
EP2	EPDM	60 Duro	Hard wearing economical rubber, with reasonable shelf life. Used extensively for spin casting work.
FS3	Nitrile	60 Duro	Slightly harder rubber with very good shelf life. Excellent for jewellery and souvenirs
FS5	Nitrile	75 Duro	Harder rubber with very good shelf life. Ideal for spin casting larger items, where distortion of product is a problem, such as medals.
F16	Natural Rubber	45 Duro	Soft easy to use rubber with good shelf life. Excellent for fine work, such as rings.

Most common sizes are available i.e. 6", 9", 10", 12" Discs with or without a 1 1/2" centre hole. Sheets are also available and thickness is to customer's specification.

Our rubber has a longer shelf life and larger number of shots than the current batch of imported rubbers.
